

Special Dies

If you desire custom typography or imagery to be stamped onto the hardcover, a special metal die must be made. It costs extra to make the die (price is per square inch), but it gives you the opportunity to use graphics and your own typefaces in the design. Call us for pricing and information.

Note: Very fine lines and textures cannot be reproduced well. The metal piece will be stamped very hard against the material, and fine detail is difficult to adhere to the textured material.

A metal die is made from the file you provide.

The metal die is used to stamp the cover.

Your die mockup can be created in InDesign, Illustrator, or any other program that keeps the type in a vector format. Saved file as an eps or pdf to maintain vectors for best clarity when making the die.
